Job Title- Quality Manager - Automotive - TS16949, ISO 14001

Location- Lehighton, PA

Contact: Jack Carrick jack@careercon.net

SUMMARY

Hands on and oversee all aspects of the Quality System and activities that occur in the Shop. Perform audits of safety, policies, and procedures to ensure daily compliance, and train accordingly. Be a driver in becoming a quality driven company which will enable the organization to become world class. Install visual work instructions to help aide the associates in their daily job activities.

ESSENTIAL FUNCTIONS

- Serve as a customer contact on quality and compliance issues
- Candidates must have Quality Management experience in metals manufacturing or plastic injection molding serving the automotive industry.
- Strong motivation, high energy and ability to work independently or in a team environment
- Train employees in the analysis of basic causes of customer complaints and returns, and participate in initiating corrective action, and following them through to validation
- Maintain and update Visual Aids as needed
- Must be able to document systems in procedures and work instructions
- Create work instructions and operating procedures for new or changed processes, as well as rework instructions for non-standard operations
- Recommend, develop, administer, and support company policies and procedures and ensure compliance with all corporate, safety, and regulatory compliance standards
- Must demonstrate working knowledge of statistical problem-solving techniques, including Process Capability Analysis, Six Sigma tools, and DOE.
- Must have blueprint reading skills, knowledge of measurement methods
- Provide technical training to personnel
- Interpret standards, specifications, quality requirements, and quality planning for in-plant customer inspections
- Prepare PPap packages for new jobs.
- Preparation and maintenance of control plans for each part to be used during production to maintain product quality
- Assure that the quality level of the finished product meets the customer's expectations
- Evaluate the performance of Quality department personnel
- Maintain accurate up-to-date inspection and test records as prescribed by the quality plan
- Participate in daily MRB disposition in a multi-shift manufacturing environment. Experience with automotive customers a must.
- Excellent written and verbal communication skills
- Thorough understanding of ISO/TS16949, APQP, PPAP/FMEA, SPC, GRR, GDT, and Corrective/Preventive Action.
- Computer literate with ability to work all Microsoft Office programs a must.

- Knowledge of Brown & Sharpe PC Dmis and statistical collection programs.
